

## Column Board

A modern new column board system designed for the classroom. The column board can be used in conjunction with all major interactive whiteboards combining traditional teaching with Interactive learning, or as an attractive stand alone product.

- A very attractive modern anodised Aluminium design suitable for every situation
- The board allows a maximum clearance behind of 15cm for all interactive whiteboards
- The board lowers to 900mm from the floor to allow for full viewing of an Interactive Whiteboard
- The board slides vertically the full length of the Aluminium columns
- The Vitreous Enamel Steel whiteboard is 2000x800mm in size
- The whiteboard surface is guaranteed for 30 years
- Column height is 2250mm
- There is a safety stop 100mm from the floor to prevent the board trapping objects
- The flush fitting wall fixing plates can be easily adjusted depending on the location and clearance required for the Interactive Whiteboard
- The board is perfectly balanced to allow easy vertical movements with only your fingertips
- The movement system uses "easy glide" steel bearings for smooth quiet operation
- The pentray runs full width of the board and is on the top and bottom of the board which doubles up as the finger grip for easy movement
- The mechanism is safely concealed within the robust column design
- The whiteboard is ergonomically correct allowing a healthy posture at all times
- The movement of the whiteboard allows full writing use for individuals with disabilities
- Wall extension brackets available
