

Premium Aluminium Display

The Premium Aluminium Display system has a sturdy aluminium frame which gives the display strength but remains lightweight. The panels are hinged together in two folding units for easy assembly. The panels are double sided and covered with a Velcro acceptable Nyloop fabric which is colourfast to BS1006.

- Available in 6,7 & 8 panel sets
- Each panel is 700x1000mm in size
- Heavy duty aluminium frame NOT plastic
- A heavy-duty PVC carry case with castors is shown as an accessory

Premium Aluminium Gear Edge Display

The Premium Aluminium Gear Edge system has edged framed panels which allow the panels to rotate up to 360 degrees. The frame is slimmer than the standard display and therefore, is lighter in weight. The panels are double sided and covered with a Velcro acceptable Nyloop fabric which is colourfast to BS1006. Top and bottom sets lock together for safety.

- Available in 6,7 & 8 panel sets
- Each panel is 700x1000mm in size
- Heavy duty aluminium frame NOT plastic
- Lights available as an accessory
- A heavy-duty PVC carry case with castors is shown as an accessory
